**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 11 and 12, drawn to a method.

Group II, claim(s) 10 and 13-20, drawn to a product.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The question of unity of invention has been reconsidered retroactively by the examiner in view of the search performed; a review of Huang et al. ("Novel Electroluminescent Conjugated Polyelectrolytes Based on Polyfluorene") makes clear that the inventions of the groups I and II lack the same or corresponding special technical feature because the cited reference appears to demonstrate that the claimed technical feature does not define a contribution which each of the inventions, considered as a whole, makes over the prior art. This is because Huang teaches the technical feature of the method of claim 1 (page 709, 2<sup>nd</sup> column, LED Fabrication and Characterization Section). Accordingly, the prior art of the record supports restriction of the claimed subject matter to the groups as mentioned immediately above.

***Election of Species***

If applicant elects the Group II invention, it is subject to an election of species as following because the species are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- i. laser (claims 15 and 18)
- ii. photodiode (claims 15 and 16)
- iii. led (claims 15 and 17)
- iv. optical interconnect (claim 15)
- v. transducer (claims 15 and 19)
- vi. semiconductor chip (claim 15)
- vii. semiconductor thin-film (claim 15)
- viii. polymeric photoswitch (claims 15 and 20)

The following claim(s) are generic: 14.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

These species fail to form a single general inventive concept for the same reason given above, as the common technical feature is the method, and the method is known in the art, therefore the method fails to become a special technical feature.

***Joint Inventors***

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Conclusion***

Claims 1-20 are pending.

Claims 1-20 are subject to election/restriction requirement.

No claim is allowed.
